

Bring the nursery to your business!

To view our 360-degree photos, you need a **modern mobile phone**.

Download the **QR Code Reader**  in the Google Play Store  **Google Play**. This is where you can import QR codes with your mobile phone, so you can go straight to the right website. Apple has already integrated a QR Code Reader into their mobile phones.

Scan the QR Code below. You will go straight to our website.

<https://www.songrow.nl/VR.html>

Here you will find some links to our 360-degree photos. **Select a 360-degree photo**. The display of your mobile phone will be „divided“ and you will see two images. **Now place your mobile phone in your glasses**.

Look through the glasses and rotate around your own axis. This will give you a good impression of what our nursery looks like.

We wish you, in the spirit of our motto: **Show, Advise and Design** a lot of fun watching the photos.
